API Inspector

Summary

Baker Consulting Group, Inc. (BCG) has been providing engineering and professional services to the petrochemical industry for over seventeen years. Our success is fueled by our commitment to exceed our client expectations while maintaining costs. Our professionals not only understand the technical aspects that go into an inspection, but also consider operational needs and future maintenance.

Position

The Inspector will execute assigned inspection projects, including interfacing with site representatives and subcontractors. Responsible for completion of field inspections, documentation, interpretation of applicable codes and standards, report preparation and technical review.

The position will be based in our Lawrenceville, GA location.

Qualifications:

- Current API-653 Certification
- API 570 and API 510 certification preferred
- ASNT Level II UT,
- ASNT Level II MT, PT, ET also desired
- Experience with MFL scanning, other tank bottom inspection techniques a bonus.
- UT phased array experience is desired
- Experience with FARO Laser Scanner is a plus
- Strong communication and time management skills
- Minimum of 3 years relevant oil and gas industry experience
- Strong computer skills with proficiency in using Microsoft Office applications
- Self-motivated with the ability to work, learn from, and teach others within the group
- Experience with, or knowledge of, AutoCAD 3D, Solidworks, or similar, is preferred
